## De Schutter'Neroc in Vreden is starting with ARAMIS

De Schutter'Neroc is by its own account one of the leading European full service providers in design and repro services in the field of packaging and marketing communication. According to De Schutter'Neroc's website, they are always doing their business "state of the art", in the Netherlands as well as in Belgium and Germany. After many years of being a market leader, De Schutter'Neroc claims to be a member of the "packaging elite".

The key to success is said to be: outstanding quality, consistency, fastest "time to market", independency, and the decrease of costs to the client's benefit. For their German location in Vreden, De Schutter'Neroc has now decided to implement the ARAMIS MIS. Also the Rotterdam operation will have direct access to the ARAMIS system in Vreden, especially for managing the sleeve and plate production for Vreden. With ARAMIS, De Schutter'Neroc in Vreden feels at best prepared for building an individual MIS solution, meeting their individual requirements within de De Schutter'Neroc group.
